

Research Volunteers

We are looking for volunteers to take part in a focus group as part of a research project being carried out by the University of Southampton.

We are interested in finding out more about how people who are living with a long-term health condition manage their health and their every day lives. We are particularly interested in how a person's network of family and friends may be involved in their support. The focus group will be guided by a trained researcher and will involve a group of about 8 volunteers who are willing to discuss and share their experiences in a confidential setting.

If you live in the Southampton area and would like to find out more about taking part in a focus group, please contact:
